WORKFORCE DEVELOPMENT BOARD

Strategic Plan: Appendix 14 – Example of Occupation Data for Use in Implementation

As part of the NWDB Strategic Plan, employment and occupation data generated by Eastern Maine Development Corporation (EMDC) using their JobsEQ subscription with Chmura Economics and Analytics. The data was used to provide context for the NWDB Strategic Plan and identify opportunities, challenges and issues for the development of goals, strategies, and actions.

Beyond the use in information this Plan, the JobsEQ data provides opportunities for NWDB and its partners to utilize ongoing employment and occupation intelligence to support strategy implementation and assessment. This fits with the strategic NWDB goals of:

- Sharing and utilizing common-set of data regarding employment and occupations
- Market training opportunities and careers and career pathways in high-demand occupations – emphasize the benefits of training (career prospects, future wages, etc.)

The Jobs EQ system not only provides broad data on employment and workforce trends but also allows for detailed data down to the specific occupation level on projected demand, real-time/current demand, wages, required education and skills, industries generating demand, and higher education programs in the region. This information can serve as a valuable tool in developing customized plans for job seekers, training programs, and career pathways.

To serve as an example for future utilization of employment and occupation intelligence, we have provided three sample occupation data profiles in this Appendix that are within the NWDB Targeted Industries of Manufacturing, Healthcare, and Information Technology. They include:

- Laborers and Freight, Stock, and Material Movers, Hand, SOC 53-7062
- Registered Nurses, SOC 29-1141
- Computer User Support Specialists, SOC 15-1151

Through JobsEQ profiles can be completed for any 5-digit Occupation Code.

Occupation Snapshot

6-Digit Occupation	Empl	Avg Mean Wages	LQ	3-Year Empl Change	Annual Demand	Forecast Ann Growth
Laborers and Freight, Stock, and Material Movers, Hand	1,166	\$29,500	0.44	18	144	-1.0%

- “Annual Demand” is the projected need for new entrants into an occupation. New entrants are needed due to expected growth and to replace workers who left the occupation due to factors such as retirement or switching careers.
- “Forecast Ann Growth” is the expected change in jobs due to national, long-term trend projections (per the BLS) as well as local factors such as industry mix and population growth (as computed and modeled by Chmura).

Employment by Industry

Industry Title	% of Occ Empl	Empl	10-Year Separations	10-Year Empl Growth	10-Year Total Demand
Couriers and Express Delivery Services	17.4%	203	274	-11	262
Employment Services	6.7%	78	103	-7	96
General Freight Trucking	4.9%	58	75	-7	68
Grocery and Related Product Merchant Wholesalers	4.9%	57	76	-5	72
Building Material and Supplies Dealers	4.2%	49	64	-6	58
Specialized Freight Trucking	3.3%	38	51	-4	47
Sawmills and Wood Preservation	3.3%	38	47	-8	39
General Merchandise Stores, including Warehouse Clubs and Supercenters	2.5%	30	38	-4	34
Grocery Stores	2.3%	27	36	-3	33
Warehousing and Storage	2.2%	26	37	1	38
Other Wood Product Manufacturing	1.8%	21	26	-4	22
Motor Vehicle and Motor Vehicle Parts and Supplies Merchant Wholesalers	1.7%	20	25	-3	22
Support Activities for Air Transportation	1.7%	20	27	-1	27
Pulp, Paper, and Paperboard Mills	1.5%	17	22	-3	18
Fruit and Vegetable Preserving and Specialty Food Manufacturing	1.4%	17	21	-4	17
Promoters of Performing Arts, Sports, and Similar Events	1.3%	15	21	0	21
Direct Selling Establishments	1.3%	15	18	-3	15
Beer, Wine, and Distilled Alcoholic Beverage Merchant Wholesalers	1.2%	14	19	-1	18
Lawn and Garden Equipment and Supplies Stores	1.1%	13	18	0	18
Hardware, and Plumbing and Heating Equipment and Supplies Merchant Wholesalers	1.1%	13	17	-1	16
All Others	34.1%	398	526	-37	488

The industry distribution indicates the industries in which workers in the occupation(s) are primarily found.

“10-Year Empl Growth” may show industries with positive as well as negative growth; this would indicate that the occupation(s) being examined are expected to expand within some industries while contracting in others.

Wages

Occupation	Mean	Median	Entry Level	Experienced
Laborers and Freight, Stock, and Material Movers, Hand	\$29,500	\$27,000	\$25,200	\$31,700

💡 Occupation wages here are based on data from the Bureau of Labor Statistics, OES program, and imputed by Chmura where necessary.

💡 When this report is run for an occupation group, the table above displays up to the top ten detailed occupations which have the highest average wages within the occupation group.

Skill and certifications gaps can help inform employee development programs, as well as provide a comparison of the needs of regional employers to the supply.

Occupation Gaps

- 💡 The above are the potential average annual gaps over 10 years. Many variables go into this analysis, but at its core it is based on a forecast comparing occupation demand growth to the local population growth and the projected educational attainment of those residents. When an area, for example, has an occupation expected to grow quickly but the educational requirement for the occupation does not match well with the educational attainment of its residents, there is a high potential for an occupation shortfall in the region. Alternatively, slow-growing or contracting occupations often represent potential supply surpluses.
- 💡 The potential supply shortfall is an underlying force that the market needs to resolve one way or another, such as by employers recruiting from further distances for these occupations, wages going up to attract more candidates, and/or increased demand and wages enticing more local residents to get training for these occupations. While this an important analysis for determining local occupation needs, the occupation gap should be considered along with other regional data including growth and separation forecasts, unemployment rates, wage trends, and award and skill gap analyses.

Epic Systems	0	1	-1

Top 10 Certification Gaps in NWDB Region

Name	Candidates	Openings	Gap
Neonatal Resuscitation Program (NRP)	2	4	-2
Advanced Cardiac Life Support Certification (ACLS)	27	28	-2
Licensed Practical Nurse (LPN)	2	3	-1
Certified Hospice and Palliative Nurse (CHPN)	0	1	-1
NCLEX - RN	0	1	-1
Orthopedic Surgery	0	1	-1
Certified Emergency Nurse (CEN)	0	1	-1
Neonatal Advanced Life Support (NALS)	0	1	-1
Trauma Nursing Core Course (TNCC)	3	3	0
CNOR Certification (CNOR)	2	2	0

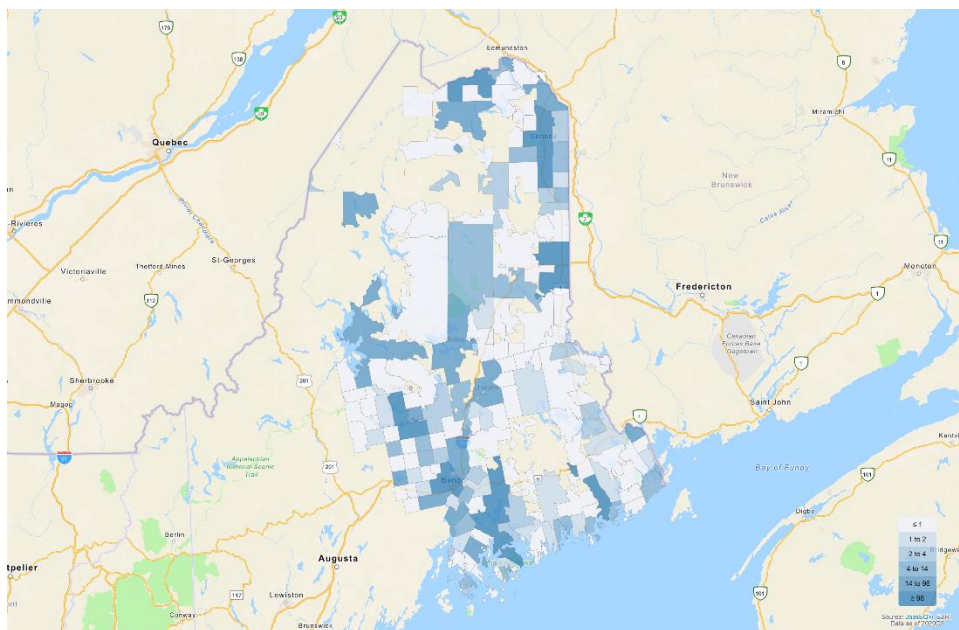

Skill and certifications gaps can help inform employee development programs, as well as provide a comparison of the needs of regional employers to the supply.

Occupation Gaps

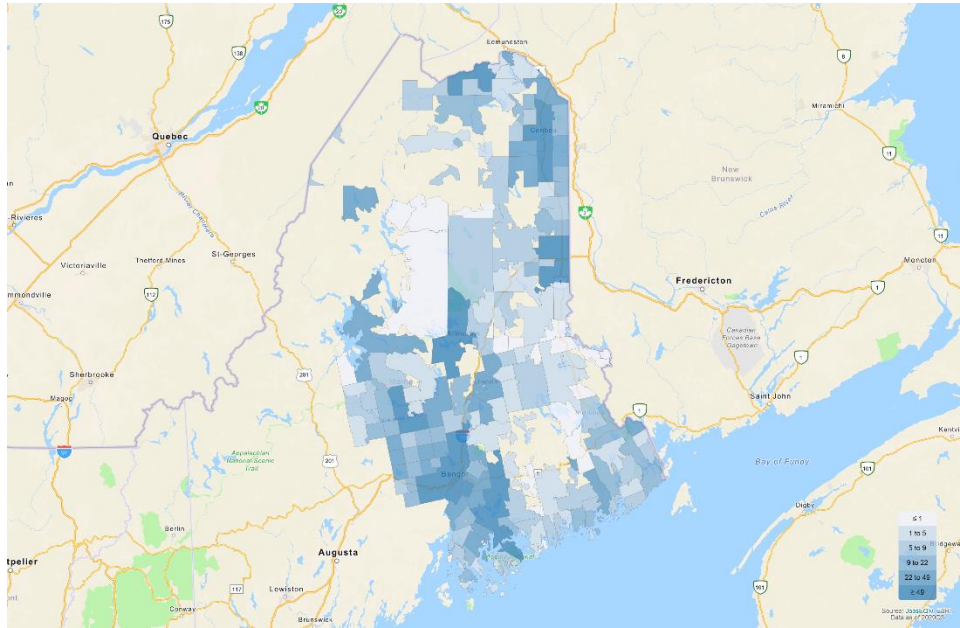

- 💡 The above are the potential average annual gaps over 10 years. Many variables go into this analysis, but at its core it is based on a forecast comparing occupation demand growth to the local population growth and the projected educational attainment of those residents. When an area, for example, has an occupation expected to grow quickly but the educational requirement for the occupation does not match well with the educational attainment of its residents, there is a high potential for an occupation shortfall in the region. Alternatively, slow-growing or contracting occupations often represent potential supply surpluses.
- 💡 The potential supply shortfall is an underlying force that the market needs to resolve one way or another, such as by employers recruiting from further distances for these occupations, wages going up to attract more candidates, and/or increased demand and wages enticing more local residents to get training for these occupations. While this an important analysis for determining local occupation needs, the occupation gap should be considered along with other regional data including growth and separation forecasts, unemployment rates, wage trends, and award and skill gap analyses.

Geographic Distribution

Top ZCTAs by Place of Work for Registered Nurses, 2020Q3

Region	Employment
ZCTA 04401	1,794
ZCTA 04736	228
ZCTA 04769	226
ZCTA 04605	169
ZCTA 04730	150
ZCTA 04426	139
ZCTA 04609	118
ZCTA 04743	103
ZCTA 04654	98
ZCTA 04412	97

Top ZCTAs by Place of Residence for Registered Nurses, 2020Q3

Region	Employment
ZCTA 04401	691
ZCTA 04736	165
ZCTA 04444	158
ZCTA 04412	154
ZCTA 04473	143
ZCTA 04605	128
ZCTA 04730	119
ZCTA 04769	118
ZCTA 04468	118
ZCTA 04743	77

💡 “Place of work” employment is based upon the location of employers for these workers. “Place of residence” data refers to the home locations of the workforce, which is typically the preferred data set to use when calculating labor availability within a drive-time or radius of a potential worksite.

Occupation Snapshot

Top ZCTAs by Place of Residence for Laborers and Freight, Stock, and Material Movers, Hand, 2020Q3

Region	Employment
ZCTA 04401	165
ZCTA 04412	41
ZCTA 04444	39
ZCTA 04468	37
ZCTA 04605	37
ZCTA 04769	37
ZCTA 04730	33
ZCTA 04736	28
ZCTA 04457	25
ZCTA 04462 (Penobscot County, ME portion)	18

“Place of work” employment is based upon the location of employers for these workers. “Place of residence” data refers to the home locations of the workforce, which is typically the preferred data set to use when calculating labor availability within a drive-time or radius of a potential worksite.

Region Definition

NWDB Region is defined as the following counties:

Washington County, Maine

Hancock County, Maine

Piscataquis County, Maine

Penobscot County, Maine

Aroostook County, Maine

Data Notes

- Occupation employment by default indicates employment by place of work. Occupation employment is as of 2020Q3 and is based on industry employment and local staffing patterns calculated by Chmura and utilizing BLS OES data. Employment forecasts are modeled by Chmura and are consistent with BLS national-level 10-year forecasts. Occupation wages (mean, median, and percentiles) are derived from BLS OES data and are as of 2019 and represent the average for all Covered Employment. Entry-level and experienced wages are derived from these source data, computed by Chmura.
- Industry employment is as of 2020Q3 and is based upon BLS QCEW data, imputed by Chmura where necessary, and supplemented by additional sources including Census ZBP data.
- Education and training requirements are from the BLS. Educational attainment mix and other occupation demographics data are modeled by Chmura for 2020Q3 using regional occupation employment from JobsEQ, ZCTA-level demographics data from the Census Bureau, and national occupation-demographics patterns from the BLS.
- Postsecondary awards are per the NCES and are for the 2018-2019 academic year. Any programs shown are linked with the occupation(s) being analyzed via the program-occupation crosswalk, which may not be comprehensive. Any programs shown reflect only data reported to the NCES; reporting is required of all Title IV schools. Training providers that do not report data to the NCES are not reflected.
- Job ads data are online job posts from the Real-Time Intelligence (RTI) data set, produced wholly by Chmura and gleaned from over 30,000 websites. Data reflect ads active during the last twelve month period ending 03/25/2021 and advertised for any Zip Code Tabulation Area in or intersecting with the region for which this report was produced. Historical ad volume is revised as additional data are made available and processed. Since many extraneous factors can affect short-term volume of online job postings, time-series data can be volatile and should be used with caution. All ad counts represent deduplicated figures.
- For skill and certification gaps, openings and candidates are based upon regional occupation demand (growth plus separations) and the percent of skill demand and supply. Skill demand mix data are per a one-year sample of RTI data; skill supply data are estimated using a five-year sample of resumes data; both data sets compiled as of January 2021. Data may be based, at least in part, on data from broader geographies; see the Skill Gaps analytic export for more details.
- Occupation gaps are modeled by Chmura, indicating long-term potential supply and demand mismatches in a region due, in part, to job demand and labor pool dynamics, including educational attainment and projected growth.
- Occupation employment by place of residence is as of 2020Q3 and modeled by Chmura based upon occupation employment by place of work and commuting patterns. Commuting patterns are derived from source data from the Census Bureau, occupation-specific commuting tendencies, and updated to reflect more recent population and employment estimates.
- Figures may not sum due to rounding.

FAQ

What is (LQ) location quotient?

Location quotient is a measurement of concentration in comparison to the nation. An LQ of 1.00 indicates a region has the same concentration of an industry (or occupation) as the nation. An LQ of 2.00 would mean the region has twice the expected employment compared to the nation and an LQ of 0.50 would mean the region has half the expected employment in comparison to the nation.

What is annual demand?

Annual demand is a of the sum of the annual projected growth demand and separation demand. Separation demand is the number of jobs required due to separations—labor force exits (including retirements) and turnover resulting from workers moving from one occupation into another. Note that separation demand does not include all turnover—it does not include when workers stay in the same occupation but switch employers. Growth demand is the increase or decrease of jobs expected due to expansion or contraction of the overall number of jobs.
