

<b>Northeastern Workforce Development Board (NWDB)</b> <b>General Policies and Procedures</b> <b>HANDLING AND PROTECTING PERSONALLY IDENTIFIABLE INFORMATION</b>	
<b>Policy 002</b>	<b>EFFECTIVE DATE: 8/15/2016</b> <i>Revised: 09-14-2023</i>
<b>Approved by Northeastern Workforce Development Board</b>	<b>Executive Director: <i>Gaban Williamson</i></b>

**PURPOSE:**

To provide guidance on compliance with the requirements of handling and protecting PII

**BACKGROUND:**

Federal agencies, including United States Department of Labor Employment and Training Administration (US DOL-ETA) are required to take aggressive measures to mitigate the risks associated with the collection, storage, and dissemination of sensitive data including PII. The Appendix lists a brief overview of efforts at the Federal level to protect PII. As the grantor agency, ETA has provided the Training and Employment Guidance Letter (TEGL) 39-11, to all grantees, including Maine Department of Labor, to notify them of the specific requirements pertaining to the acquisition, handling, and transmission of PII. Federal law, OMB Guidance, and Departmental and ETA polices require that PII and other sensitive information be protected. ETA has examined the ways its grantees, as stewards of Federal funds, handle PII and sensitive information and has determined that to ensure ETA compliance with Federal law and regulations, its grantees must secure transmission of PII and sensitive data developed, obtained, or otherwise associated with ETA funded grants.

As part of the NWDB local area grant activities, NWDB and its providers may handle large quantities of PII relating to their organization and staff; sub-grantee and partner organizations and staff; and individual program participants. This information is generally found in personnel files, participant data sets, performance reports, program evaluations, grant and contract files and other sources. NWDB has established this policy in accordance with the requirements set forth by US DOL-ETA for the handling and protection of PII.

**GENERAL PROVISIONS FOR THE HANDLING AND PROTECTION OF PERSONALLY IDENTIFIABLE INFORMATION (PII):**

The NWDB, including its partners, providers, sub-contractors shall adopt the following definitions and requirements as policy for the handling of Personally Identifiable Information in the State of Maine’s Northeastern Local Area.

**Definitions:**

**PII** - information that can be used to distinguish or trace an individual’s identity, either alone or when combined with other personal or identifying information that is linked or linkable to a specific individual.

**Sensitive Information** – any unclassified information whose loss, misuse, or unauthorized access to or modification of could adversely affect the interest or the conduct of Federal programs, or the privacy to which individuals are entitled under the Privacy Act.

**Protected PII and non-sensitive PII** - the Department of Labor (the Department) has defined two types of PII, protected PII and non-sensitive PII. The differences between protected PII and non-sensitive PII are primarily based on an analysis regarding the “risk of harm” that could result from the release of the PII.

- *Protected PII* is information that if disclosed could result in harm to the individual whose name or identity is linked to that information. Examples of protected PII include, but are not limited to, social security numbers (SSNs), credit card numbers, bank account numbers, home telephone numbers, ages, birthdates, marital status, spouse names, educational history, biometric identifiers (fingerprints, voiceprints, iris scans, etc.), medical history, financial information and computer passwords.
- *Non-sensitive PII*, on the other hand, is information that if disclosed, by itself, could not reasonably be expected to result in personal harm. Essentially, it is stand-alone information that is not linked or closely associated with any protected or unprotected PII. Examples of non-sensitive PII include information such as first and last names, e-mail addresses, business addresses, business telephone numbers, general education credentials, gender, or race. However, depending on the circumstances, a combination of these items could potentially be categorized as protected or sensitive PII.

To illustrate the connection between non-sensitive PII and protected PII, the disclosure of a name, business e-mail address, or business address most likely will not result in a high degree of harm to an individual. However, a name linked to a social security number, a date of birth, and mother's maiden name could result in identity theft. This demonstrates why protecting the information of our program participants is so important.

### **Requirements:**

The NWDB, including its partners, providers, sub-contractors (herein, NWDB) shall comply with all of the following:

1. To ensure that such PII is not transmitted to unauthorized users, all PII and other sensitive data transmitted via e-mail or stored on CDs, DVDs, thumb drives, etc., must be encrypted using a Federal Information Processing Standards (FIPS) 140-2 compliant and National Institute of Standards and Technology (NIST) validated cryptographic module.
2. Unencrypted sensitive PII must not be delivered via e-mail to any entity, including ETA or contractors.
3. Necessary steps must be taken to ensure the privacy of all PII obtained from participants and/or other individuals and to protect such information from unauthorized disclosure. PII shall be maintained in accordance with the standards for information security described in this policy and any subsequent updates to such standards provided by ETA. For technical assistance and/or information on data security, contact the NWDB Executive Director.
4. NWDB shall ensure that any PII used during the performance of their grant has been obtained in conformity with applicable Federal and state laws governing the confidentiality of information.
5. NWDB further acknowledges that all PII data obtained through its ETA grant(s) shall be stored in an area that is physically safe from access by unauthorized persons at all times and the data will be processed using grantee issued equipment, managed information technology (IT) services, and designated locations approved by ETA. Accessing, processing, and storing of ETA grant PII data on personally owned equipment, at off-site locations e.g., employee's home, and non-grantee managed IT services, e.g., Yahoo mail, is strictly prohibited unless approved by ETA.

6. NWDB employees and other personnel who will have access to sensitive/confidential/proprietary/private data must be advised of the confidential nature of the information, the safeguards required to protect the information, and that there are civil and criminal sanctions for noncompliance with such safeguards that are contained in Federal and state laws.
7. Before being granted access to PII, all NWDB employees and other personnel that may handle PII in the scope of grant activities, must acknowledge their understanding of the confidential nature of the data and the safeguards with which they must comply in their handling of such data as well as the fact that they may be liable to civil and criminal sanctions for improper disclosure.
8. Information must not be extracted from data supplied by ETA for any purpose not stated in the grant agreement.
9. Access to any PII created by the ETA grant must be restricted to only those employees who need it in their official capacity to perform duties in connection with the scope of work in the grant agreement.
10. All PII data must be processed in a manner that will protect the confidentiality of the records/documents and is designed to prevent unauthorized persons from retrieving such records by computer, remote terminal or any other means. Data may be downloaded to, or maintained on, mobile or portable devices only if the data are encrypted using NIST validated software products based on FIPS 140-2 encryption. In addition, wage data may only be accessed from secure locations.
11. PII data obtained through a request from ETA must not be disclosed to anyone but the individual requestor except as permitted by the Grant Officer.
12. ETA and MDOL shall be permitted to make onsite inspections during regular business hours for the purpose of conducting audits and/or conducting other investigations to assure that the NWDB is complying with the confidentiality requirements described above. In accordance with this responsibility, NWDB will make, records applicable to this Agreement, available to authorized persons for the purpose of inspection, review, and/or audit. Likewise, NWDB shall be permitted to conduct onsite inspections and investigations of all contracted parties for the purpose of inspection, review, and/or audit of records relative to grant activities and/or conducting other investigations to assure compliance related to this policy.
13. Data received in the scope of conducting grant activities, shall be retained only for the period of time required to use it for assessment and other purposes, or to satisfy applicable Federal records retention requirements, if any. Thereafter, all data will be destroyed, including the degaussing of magnetic tape files and deletion of electronic data.

The failure to comply with the requirements identified in this policy, or any improper use or disclosure of PII for an unauthorized purpose, may result in the termination or suspension of the grant and/or contract with NWDB, or the imposition of special conditions or restrictions, or such other actions as the NWDB may deem necessary to protect the privacy of participants or the integrity of data.

**Recommendations** Protected PII is the most sensitive information that you may encounter in the course of conducting grant work, and it is important that it stays protected. Providers/sub-contractors are required to protect PII when transmitting information, but are also required to protect PII and sensitive information when collecting, storing and/or disposing of information as well. Outlined below are some recommendations to help protect PII:

- Before collecting PII or sensitive information from participants, have participants sign releases acknowledging the use of PII for grant purposes only.

- Whenever possible, ETA recommends the use of unique identifiers for participant tracking instead of SSNs. While SSNs may initially be required for performance tracking purposes, a unique identifier could be linked to the each individual record. Once the SSN is entered for performance tracking, the unique identifier would be used in place of the SSN for tracking purposes. If SSNs are to be used for tracking purposes, they must be stored or displayed in a way that is not attributable to a particular individual, such as using a truncated SSN.
- Use appropriate methods for destroying sensitive PII in paper files (i.e., shredding or using a burn bag) and securely deleting sensitive electronic PII.
- Do not leave records containing PII open and unattended.
- Store documents containing PII in locked cabinets when not in use.
- Immediately report any breach or suspected breach of PII to the Federal Project Officer (FPO) responsible for the grant, and to ETA Information Security at [ETA.CSIRT@dol.gov](mailto:ETA.CSIRT@dol.gov), (202) 693-3444, and follow any instructions received from officials of the Department of Labor.

**Inquiries** Questions should be addressed to the NWDB Executive Director.

Appendix: “Applicable Federal Laws and Policies Related To Data Privacy, Security and Protecting Personally Identifiable and Sensitive Information”

## APPENDIX

### FEDERAL LAWS AND POLICIES RELATED TO DATA PRIVACY, SECURITY AND PROTECTING PERSONALLY IDENTIFIABLE AND SENSITIVE INFORMATION

- Privacy Act of 1974 (the Privacy Act) – Governs the collection, maintenance, use, and dissemination of personally identifiable information about individuals maintained in systems of records by Federal agencies. The Privacy Act prohibits the disclosure of information from a system of records without the written consent of the individual, unless the disclosure is permissible under one of twelve statutory exceptions. The Privacy Act also provides individuals with a way to seek access to and make amendment of their records and establishes various agency record-keeping requirements. The Privacy Act does not generally apply to personally identifiable information collected and maintained by grantees.
- Computer Security Act of 1987 – Passed to improve the security and privacy of sensitive information in Federal computer systems and created a means for establishing minimum acceptable security practices for such systems. It required agencies to identify their computer systems that contained sensitive information, create computer security plans, and provide security training of system users or owners on the systems that house sensitive information. It was repealed by the Federal Information Security Management Act (FISMA).
- FISMA – Enacted as Title III of the E-Government Act of 2002, FISMA required each Federal agency to develop and implement an agency-wide program to safeguard the information and information systems that support the operational assets of the agency, including the assets managed by other agencies or contractors.
- On May 22, 2006, the Office of Management and Budget (OMB) issued M-06-15, Safeguarding Personally Identifiable Information. In this memorandum, OMB directed Senior Officials for Privacy to conduct a review of agency policies and processes and to take necessary corrective action to prevent intentional or negligent misuse of, or unauthorized access to, PII.
- On July 12, 2006, OMB issued M-06-19, Reporting Incidents Involving Personally Identifiable Information and Incorporating the Cost for Security in Agency Information Technology Investments. In this memorandum, OMB provided updated guidance for reporting of security incidents involving PII.
- On May 10, 2006, Executive Order 13402 established the President’s Task Force on Identity Theft. The Task Force was charged with developing a comprehensive strategic plan for steps the Federal government can take to combat identity theft and recommending actions which can be taken by the public and private sectors. On April 23, 2007, the Task Force submitted its report to the President, titled “Combating Identity Theft: A Strategic Plan.” This report is available at [www.idtheft.gov](http://www.idtheft.gov).
- On May 22, 2007, OMB issued M 07-16, Safeguarding Against and Responding to the Breach of Personally Identifiable Information. In this memorandum, OMB required agencies to implement a PII breach notification policy within 120 days.
- NIST SP 800-122, Guide to Protecting the Confidentiality of PII – Released by NIST in April 2010, this document is a guide to assist Federal agencies in protecting the

confidentiality of PII in information systems. The guide explains the importance of protecting the confidentiality of PII in the context of information security and explains its relationship to privacy. The document also suggests safeguards that may offer appropriate levels of protection for PII and provides recommendations for developing response plans for incidents involving PII.
